SUMMARY

AI governance and responsible AI professional with a Master of Interdisciplinary Artificial Intelligence from the University of Ottawa and a master's degree in development management. I led a four-person team on a public funding accountability project that resolved about 23 million records into about 851,000 organizations, using probability-based matching, a language model, validation, and human review. I advise Canadian organizations on AI governance, vendor selection, policy development, and staff training through BRUKD Consultancy, and I teach AI governance, Canadian privacy law, and professional ethics at Seneca Polytechnic. I wrote a book, Evidence-Based AI: The Discipline Behind Reliable AI, and two SSRN working papers on AI governance in Canada.

SKILLS

Governance and Regulation: AI governance and risk, Responsible AI, PIPEDA, Quebec's Law 25, Directive on Automated Decision-Making, Algorithmic Impact Assessment, NIST AI RMF, OSFI E-23

Practice: Data governance and quality, Policy and documentation, Stakeholder facilitation and training

Tools: Python, SQL, Power BI, Tableau, SAS, Splink

EXPERIENCE

Lead Consultant

BRUKD Consultancy, Toronto, ON

December 2017 to Present

- Advise Canadian small and mid-sized organizations on AI governance, vendor selection, policy writing, and staff training. Developed the BRUKD Reliable AI Adoption Framework and built proof-of-concept tools for governance readiness, vendor selection, and ROI assessment.
- Worked with a Canadian real estate firm on CRM analysis and HTML, JavaScript, and CSS web design, including a lead scoring model built from agent engagement data and shown in a Power BI dashboard. Client details are confidential.
- Started as a freelance consultancy in research and advanced analytics. Early work was linked to East Africa and Asia.

Part-Time Professor

Seneca Polytechnic, George Brown Polytechnic, Computek College, Centennial College, Toronto, ON

February 2021 to Present

- Teach Law, Ethics and Social Responsibility (BTE620) in Seneca's Honours Bachelor of Technology in Software Development: AI governance, algorithmic bias, PIPEDA, Quebec's Law 25, and professional ethics.
- Designed the Seneca course materials and a case library. Earlier taught applied analytics with Advanced Excel and business intelligence.
- Teach graduate Data Management and Analytics at George Brown to 60+ students, using Power BI, Advanced Excel, Hadoop, and MySQL, with data governance and responsible AI in the coursework.
- Teach business, accounting, and database management at Computek to 300+ students in diploma and postgraduate programs.
- Developed the curriculum for Computek's postgraduate Business Operations, Strategies and Sales (BOSS) program, six courses in total.
- Taught postgraduate Marketing Analytics, Database Mining, Applied Quantitative Research, and Big Data Analytics at Centennial until December 2025, to nearly 200 students.

- Used SAS Enterprise Miner, SAS Viya, Tableau, and XLMiner in class, and embedded data governance and responsible AI in the coursework.

Earlier Experience

- Program monitoring and evaluation, social and environmental impact assessment, and university teaching and research, including UNDP-funded research on early warning systems for coastal communities, contributing to national assessment guidelines, leading 20+ public hearings, and supervising 10+ student research projects.

PROJECTS

Public Funding Accountability Platform
University of Ottawa, AI For Accountability Hackathon, April 2026
Live demo: danieldemoz.github.io/evidence-ai-funding-audit/

- Led a team of four. We unified Canadian public funding data (about 23 million records) and resolved it into about 851,000 organizations, then assessed funding loops.
- Built the Splink probability-based matching, the language model stage, and the validation. The pipeline used direct matching, probability scoring, a language model, and human review of its results.
- Designed for governance: anonymized outputs, every flag traceable to its source, and findings presented as signals, not proof.

EDUCATION

Master of Interdisciplinary Artificial Intelligence, University of Ottawa, Ottawa, ON, 2025 to 2026

Average 9.6/10 (University of Ottawa scale). Coursework includes Foundations and Applications of Machine Learning; Essential Concepts in Data Science; Advanced Data Analytics; Ethics for Design, AI and Robotics; Fundamentals of Cybersecurity.

Master's Degree, Development Management, Khon Kaen University, First Class Honours

Postgraduate Certificate, Marketing Research and Analytics, Centennial College, Toronto, ON, Honours

Certificate, Teaching and Learning in Higher Education, Centennial College, Toronto, ON

Bachelor of Arts, Sociology, University of Asmara

CERTIFICATIONS

IAPP AI Governance Professional (AIGP), in progress
Critical Approaches to Generative AI, George Brown Polytechnic, 2026
Business Analysis Foundations and Business Process Modeling, IIBA
Requirements Elicitation and Analysis, NASBA
Business Analyst and Project Manager Collaboration, PMI
SAS Educator and Advanced Analytics: Regression and Logistic Regression, SAS, 2023

PUBLICATIONS

- Evidence-Based AI: The Discipline Behind Reliable AI. Book, 2026.
- Human Oversight or Automation Bias? Closing a Gap in Canada's Directive on Automated Decision-Making. SSRN working paper, August 2026.
- Artificial Intelligence Governance Maturity: A Document Analysis of Ontario's Colleges. SSRN working paper, October 2026.
